

## **ANNUAL REVIEW OF SCHOLARSHIP AWARDS**

During the first month of each new school year, the counseling staff at each high school will review the scholarship awarded to students at their school during the previous school year. The analysis will include a review of any disparity on the basis of race, gender, color, national origin, and disability (to the extent such information is available to the District). The data will be submitted to building administration and District Learning Team (DLT) as part of this annual review.
